

Dermoscent®

Animal Dermo-Care

Afrivet is proud to announce the launch of Dermoscent®

Based on the knowledge and expertise acquired in the human dermo-cosmetic industry and veterinary dermatological practices in France, the founders of Laboratoire de Dermo-Cosmétique Animale (LDCA) have conceived and developed **Dermoscent®**, the world's 1st animal dermo-care brand to promote the cutaneous health of companion animals.

Created and designed by veterinarians for veterinarians, **Dermoscent®** products are marketed exclusively through the veterinary channel for the improvement of dermatological health of dogs and cats.

The **Dermoscent®** range contains a combination of essential oils, vegetable oils and natural cleansing agents. The ingredients are 100 % natural and were only included after a vigorous selection process. This ensures that only high quality ingredients are included in the **Dermoscent®** range.

Regular use of the **Dermoscent®** products will hydrate and nourish the pet's skin resulting in a smooth shiny hair coat. **Dermoscent®** products improve skin barrier function and balance the skin's micro flora which improves skin odour, thus assisting in improving the human pet bond.

Compliant and user-friendly, **Dermoscent®** brings a practical skin care regimen with scientifically proven results to improve animals' skin health, well-being and coat beauty.

Dermoscent® will exclusively be marketed and distributed by **Afrivet**.

Compiled by: Dr Charles Gilfillan BSc(Agric) BVSc(Hons)

The Dermoscent® range consists of:

- **Essential 6 spot-on** for dogs & cats
- **Essential 6 Shampoo**
